

## Cirque du Soleil® – LOVE™, Las Vegas, USA

Celebrating the legendary work of '60s musical icons The Beatles, Cirque du Soleil created LOVE™ at the Mirage Casino and Resort in Las Vegas. Stage Technologies supplied over 100 axes of movement which comprise a complex combination of platforms, screens, and scenic elements that transition smoothly from one scene to the next. Stage Technologies were also responsible for the design and manufacture of wireless tracks and trolleys for a theatre-in-the-round for performer flying, in addition to the supply of numerous hoists and controls of multiple stage machines.

The BigTow winches (which hang from the grid at either side of the theatre and from the openings) have a load capacity of 600lbs per winch; the trolley winches have a load capacity of 550lbs per winch.

- 4 Nomad control consoles
- 5 Solo handheld controllers
- MaxisID control system
- 13 wireless trolleys on 9 tracks
- 62 BigTow winches
- 11 stage lift controls
- 4 traps
- 2 sloat mechanism controls
- Chameleon software

**Location:** USA
