

## Mercedes-Benz World, Weybridge

Brooklands Circuit, which was the world's first purpose-built racing circuit, became home to the UK's largest Mercedes-Benz showcase in 2006. The centre has a range of customised courses and now hosts a diverse range of events from motoring and aviation festivals to corporate incentive days, fun runs and concerts.

The Stage Technologies hire department provided a 3-axis performer flying system for the launch of the new facility. The event featured a flying silk performer and two flying acrobats who presented and cut a giant ribbon to signify the official opening.

The load in and load out was all coordinated with other service providers for this very successful week-long event.

- Juggler control console
- 3 BigTow winches
- 4-way control system

Location: UK  
Date commenced: October 2006 – 1 week hire  
Date ended: October 2006
