

The Sydney Theatre, Walsh Bay

The Sydney Theatre on the Harbour at Walsh Bay was designed as a specialist drama and dance venue for the Sydney Theatre Company, as well as for productions from touring companies from Australia and around the world. The venue comprises an impressive 896-seat auditorium with outstanding technical capabilities as well as a sprung-floor rehearsal studio, spacious function room and stylish, sweeping foyer spaces.

Stage Technologies worked with Jands, Australia's sound, lighting and staging specialists, to supply a power flying system to automate over 60 axes. A Stage Technologies Nomad desk and MaxisID control system are used to automate 64 flying bars.

- Nomad control console
- Solo hand held controller
- MaxisID control system
- 64-axis power flying system

Location: Australia
Date commenced: April 2002
Date completed: August 2004
